The DGSSC team helped touch-up the paint on the stars at Memorial Park in Marshall for SMSU's Day of Service during homecoming week!

Greetings from SMSU:

Happy fall, Mustang Family!

We wrapped up homecoming festivities here on campus mid-October, and our students are just over one a month away from finishing their first semester at SMSU.

As students are hard at work studying, finishing up group projects, and making plans to register for spring semester courses, we wanted to highlight the support services we offer to give them the boost they need to finish out the semester strong.

In this month's newsletter, we have included information about tutoring support here on campus and ways to recharge during an intense study session. As always, if you have any questions or concerns, please contact our office by calling (507) 537-6484 or emailing success@smsu.edu.

Go Mustangs!

Director of Student Success

Success Spotlight: Free Tutoring Services

Every student learns differently, and often times the first semester of college classes is more challenging and rigorous than students were used to in high school. SMSU recognizes that many students need extra support when it comes to mastering course material, which is why we offer in-person and virtual tutoring support for students.

Within the Deeann Griebel Student Success Center (IL 224), students have the opportunity to work one-on-one with a tutor for a variety of subjects including Math (through the [Math Learning Center](#)), and Biology, Chemistry, Speech, and English Learner Lab through [Interdisciplinary Tutoring](#)! During available tutoring hours, students are able to drop in (no appointment necessary) to get help on assignments, understand course concepts, or just get extra practice before an exam. There is also a [Writing Center](#) on the 5th floor of the McFarland Library to assist students with their research papers.

We also recognize that students aren't always able to carve out time for in-person tutoring, which is why SMSU also provides students with free 24/7 virtual tutoring support through Tutor.com. This resource connects students with an individual tutor to work one-on-one through their questions just as they would in person. Students can use this service at any time through D2L with access to 100 different subjects.

The Deeann Griebel Student Success Center offers Supplemental Instruction (SI), which involves utilizing a model student-peer who has recently and successfully completed a course. The SI leader will attend the course a second time and lead peer-facilitated study sessions over the course content outside of regular class hours. For specific SI courses, visit our [Supplemental Instruction page](#).

Success Strategy: Recharge While Studying

Eat a healthy snack: Fruits, vegetables, and high-protein snacks can fuel students through their study block. It's important to avoid heavy snacks that cause students to get sleepy halfway through.

Read a chapter from a fiction book: Reading for pleasure can be relaxing and it will take the student's mind off studying for a bit. Working the brain in a different way is a great method for students to take a short break from their current lesson.

Go for a walk (or bike ride, or swim, etc.): Getting physical activity gives a student's brain a break from academics. They'll not only recharge their mind but they'll also burn calories and get some exercise.

Be productive around their space: Throw in a load of laundry or wash dirty dishes. Checking these things off the to-do list can provide the kick start students need to be just as productive with their schoolwork. Plus, getting their surroundings cleaned up a bit will help them focus better on their work.

Take a power nap: But no longer than 25 minutes! Students don't want to wake up feeling groggy; rather they should feel energized and ready to get back to work.
